

THE HEALTHY ANIMAL UPDATE

June 2005

The purpose of this newsletter is to empower you to keep your animals healthy-- and yourselves healthy, too. I am very grateful that so many people are committed to having the animals in the world be as healthy as possible, and to helping the world to begin to heal, as well. Each one of you is special to me, so please continue to give me feedback, requests and suggestions. Thank you for those who responded to the survey. I will be collecting information and using it to provide what is wanted in this newsletter and also for lectures I teach.

WHAT DO YOU WANT TO HEAR ABOUT?

Thank you to everyone who has written in with questions. Remember I have the healthy people section, too, so ask human related questions as well. If you wish me to use a different email address, or to stop receiving this newsletter, please email HealThyAnimals@aol.com.

1. Healthy Animal Reminders

a. Symptoms are Good

Too often even experienced homeopaths want those pesky symptoms to go away, especially the ones we can see and hear like – skin, itching, smelly ears, etc. It is critical to remember that symptoms are a sign that the vital force is strong enough to be healing itself. The more superficial the symptoms, the more healthy they are. The more down the body (legs, feet) the more the healing is progressing.

2. Readers Share and Ask:

a. Ticks

I use Quantum's 100% Natural Herbal Skin Conditioning Spray on my dogs for ticks (& fleas). I know this stuff deters them from attaching themselves to the dogs but I now think this spray will cause them to detach. I get at our local health food store. <http://www.quantumherbalproducts.com/Catalog/herbs.cgi/10451.800.348.0398> The ingredients are: Essential oils of Rose Geranium, Eucalyptus & Tree tea, extracts of St. John's Wort, Rue, Neem Wormwood, Holy Basil and Black Walnut Hulls.

Also, the Trix Tick Remover works wonders – even inside the ears. No need to touch the ticks. <http://tickremover.com/>

3. Media Coverage and News:

a. Look at Produce Stickers.

Those little stickers on fruit and vegetables contain different PLU codes depending on whether the fruit was conventionally grown, organically grown or genetically modified. The PLU code for conventionally grown fruit consists of four numbers, organically grown fruit has five numbers prefaced by the number nine, and GM fruit has five numbers prefaced by the number eight.

b. Pulsed Signal Therapy

Pulsed Signal Therapy is a non-invasive device which uses electromagnetic pulses to treat a variety of disorders such as arthritis, back or neck pain, sporting related injuries, tendonitis, hip dysplasia, fractures, and wounds-just to name a few. *How does PST work?* In a healthy animal the body produces a low power electrical signal to stimulate the healing of damaged tissue or cartilage. However, many factors can impede this natural healing process including age, disease or injury. PST actually mimics these natural signals in the body to then stimulates and promotes the healing process by creating a low power electromagnetic field. PST is an effective alternative to either surgical intervention or long term use of pain. In Virginia, Dr. Danoff uses the machine - www.vetrehab.org. For general information, go to www.pstworld.com/.

c. Class Action Suit Happening about Animal Vaccine Disclosures

The class action lawsuit is underway. Childress Duff Goldblatt, Ltd of Chicago, Illinois has a specific web page to visit to declare you had a problem. <http://www.dogsadversereactions.com/vaccines.html>
